Skills

Python • C++ • SQL • API • LLM • Git • OverLeaf • Linux (Ubuntu) • Node.js • Supabase • React

Statement

Computer Science graduate with **1 year** of tech-work experience and a background in **AI evaluation** and **software development**. I'm a **strong communicator** in both **English** and **Spanish**, with a focus on fostering a collaborative work culture that supports high-quality results and a positive work environment.

Education

Texas State University — San Marcos, TX
Bachelor of Science in **Computer Science** — December 2025

Work Experience

Handshake AI Contractor February 2026 – Present
Evaluates multimodal AI systems using real-world image, audio, and text prompts; analyzes model outputs to identify reasoning errors, inaccuracies, and clarity issues; develops accurate benchmark responses for AI training and evaluation; maintains consistent quality standards while supporting improvements in model accuracy and performance.

Games Associate – Main Event August 2019 – March 2020
Maintained and troubleshot arcade and gaming systems to ensure reliable operation while assisting guests with virtual point systems and resolving technical and account-related issues to support a positive customer experience.

Projects

Workout and Meal Prep Application

Built a full-stack AI health app (React, FastAPI, Supabase/PostgreSQL) that generates personalized workout/meal plans via OpenAI's GPT-4o-mini, backed by a custom rules engine that validates every AI recommendation against a database for allergens and injury contraindications, auto-substituting unsafe items with reasoned explanations. Implemented bcrypt-based authentication with server-side sessions, a 12+ endpoint REST API, and 68 pytest unit tests.

Aquifer Conservation Alliance Website

Developed and customized a responsive web application for the Aquifer Conservation Alliance, implementing features for aquifer data tracking and automated updates on water-related events. Focused on responsive design, user accessibility, and clear presentation of environmental data.
